

ISO 14001 Environmental Management Systems Requirements - Awareness Training Course

A training course organized by the Malta Laboratories Network Institute for Scientific Development.

Benefits of the course

ISO 14001 Environmental Management Systems (EMS) Requirements - Awareness Training Course aims to guide organizations in managing their environmental responsibilities in a systematic manner that contributes to environmental sustainability.

Through this course, the participants will be able to:

- Identify and apply the requirements of ISO 14001;
- Define and explain the terms in relation to ISO 14001;
- Identify all legal and compliance EMS Requirements;
- Appraise the organization's environmental performance;
- Achieve environmental objectives;
- Plan to pursue environmental initiatives that are aligned with business priorities within a sustainable framework approach;
- Nurture a sense of environmental commitment;
- Share ideas and network with experts in the field.

The course is led through an interactive approach encouraging active participation and discussion between the participants and tutor.

Learning outcomes

By the end of the course, the participants will be able to:

- i. Appreciate the relevance of ISO 14001 and its application;
- ii. Apply key requirements of ISO 14001 in practice;
- iii. Identify priority areas within organizations that will be subjected to EMS;
- iv. Identify training needs to reflect environmental commitment in line with ISO 14001;
- v. Implement strategies to meet the needs;
- vi. Develop and communicate an environmental policy;
- vii. Conduct a management review of EMS performance and set the organization's objectives to reflect an environmental commitment.

Participants will enhance their competency skills to:

- viii. Prepare EMS activities
- ix. Conduct EMS activities
- x. Increase profitability
- xi. Operate with efficiency and cost savings
- xii. Conserve natural resources
- xiii. Contribute to the reduction in general wastes

Who should participate?

ISO 14001 is applicable to any organization, regardless of size, type and nature which seeks assistance in establishing an Environmental Management Systems.

Target audience

- xiv. Stakeholders requiring detailed knowledge of EMS
- xv. Management representatives
- xvi. EMS managers
- xvii. Internal and External EMS Auditors
- xviii. Non-governmental organization (NGOs)
- xix. Students wishing to gain experience on EMS Requirement

Certificate of participation will be awarded to participants
